Verifying the deicing capacity of superhydrophobic anti-icing surfaces based on wind and thermal fields

Chunling Zhu, Senyun Liu, Yizhou Shen, Jie Tao, Guanyu Wang, Lei Pan

PII: S0257-8972(16)31041-6
DOI: doi:[10.1016/j.surfcoat.2016.10.098](https://doi.org/10.1016/j.surfcoat.2016.10.098)
Reference: SCT 21749

To appear in: *Surface & Coatings Technology*

Received date: 12 June 2016
Revised date: 14 October 2016
Accepted date: 15 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Verifying the deicing capacity of superhydrophobic anti-icing
surfaces based on wind and thermal fields**
