

Accepted Manuscript

On a better estimate of the charge collection function in CdTe solar cells:
Al₂O₃ enhanced electron beam induced current measurements

Benjamin Bissig, Martina Lingg, Carlos Guerra-Nunez, Romain Carron,
Fabio La Mattina, Ivo Utke, Stephan Buecheler, Ayodhya N. Tiwari

PII: S0040-6090(16)30434-5
DOI: doi: [10.1016/j.tsf.2016.08.012](https://doi.org/10.1016/j.tsf.2016.08.012)
Reference: TSF 35385

To appear in: *Thin Solid Films*

Received date: 26 May 2016
Revised date: 29 July 2016
Accepted date: 4 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
