

## Accepted Manuscript

Toward an accurate quantification in atom probe tomography reconstruction by correlative electron tomography approach on nanoporous materials

Isabelle Mouton , Tony Printemps , Adeline Grenier ,  
Narciso Gambacorti , Elisa Pinna , Mariavitalia Tiddia ,  
Annalisa Vacca , Guido Mula

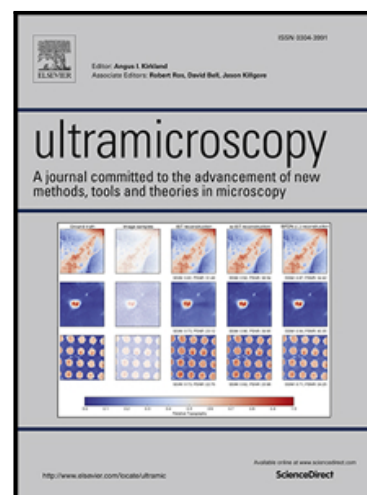

PII: S0304-3991(17)30103-1  
DOI: [10.1016/j.ultramic.2017.06.007](https://doi.org/10.1016/j.ultramic.2017.06.007)  
Reference: ULTRAM 12392

To appear in: *Ultramicroscopy*

Received date: 7 March 2017  
Revised date: 15 May 2017  
Accepted date: 9 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Nanoporous materials atom probe tomography analysis.
- Correlative atom probe tomography and electron microscopy.
- Calibration of the atom probe tomography reconstruction parameters.
