This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We conduct a systematic search of the literature on machine scheduling problems in production.
- We apply a content analysis to literature reviews identified in the literature search.
- We propose a classification scheme for machine scheduling problems in production.
- We assign the identified papers to the classification scheme.
- We comprehensively analyse the sample.
