

## Accepted Manuscript

Mathematical model for pest-insect control using mating disruption and trapping

Roumen Anguelov, Claire Dufourd, Yves Dumont

PII: S0307-904X(17)30508-5  
DOI: [10.1016/j.apm.2017.07.060](https://doi.org/10.1016/j.apm.2017.07.060)  
Reference: APM 11910

To appear in: *Applied Mathematical Modelling*

Received date: 16 June 2016  
Revised date: 20 July 2017  
Accepted date: 31 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Piecewise-smooth dynamical systems used to model pest-insect control via pheromone mating disruption and trapping.
- Small or invading populations can be controlled with relatively low level of control
- Highly nonlinear discontinuous response to the control of an established population
