This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- New method for topology optimization of antenna based on the topological derivative
- Topological asymptotic analysis of a semi-coupled PDEs system
- A striking simple fixed-point topology design algorithm is devised
- Several numerical examples are presented
- Application to a breast cancer hyperthermia treatment with noisy real data
