This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An second-order time-spectral space-scheme for space fractional CH equation.
- The proposed scheme satisfies mass conservation and energy degradation.
- The fractional order controls the thickness and the lifetime of the interface.
- The mean-zero solutions of the space fractional CH equation may be unstable.
