Dynamics of the process of the rope winding (unwinding) on the winch

Ljubinko Kevac, Mirjana Filipovic, Aleksandar Rakic

PII: S0307-904X(17)30119-1
DOI: [10.1016/j.apm.2017.02.023](https://doi.org/10.1016/j.apm.2017.02.023)
Reference: APM 11611

To appear in: *Applied Mathematical Modelling*

Received date: 28 January 2016
Revised date: 19 January 2017
Accepted date: 14 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- “Jumpy” nonlinear in one row radially multilayered rope winding on the winch
- Cable suspended system with three “jumpy” winding (unwinding) sub-systems
- Simulation experiments which show “jumpy’ winding (unwinding) process
- Two software packages: JUMPWIND - OW and JUMPWIND - RSCPR
