Modelling and dynamics of a two-line kite

G. Sánchez-Arriaga, M. García-Villalba, R. Schmehl

PII: S0307-904X(17)30179-8
DOI: [10.1016/j.apm.2017.03.030](https://doi.org/10.1016/j.apm.2017.03.030)
Reference: APM 11671

To appear in: *Applied Mathematical Modelling*

Received date: 2 December 2016
Revised date: 9 March 2017
Accepted date: 15 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Lagrangian model for a two-line kite.
- Analysis of natural symmetric and asymmetric equilibrium states.
- Floquet analysis of natural and driven periodic orbits.
- Chaotic dynamics for periodically driven kites.
- High tensions and cross-wind conditions without control are shown.
