This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Exact confidence sets for the two-parameter Rayleigh distribution are presented
- Constrained optimization problems are stated to determine the minimum-size sets
- Efficient procedures based on minimizing Lagrangian functions are proposed
- Three real data sets are analyzed
- Pointwise and simultaneous confidence bands and hypothesis tests can be derived
