This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

- Competitive location problem with the distance-based coverage is introduced.
- The objectives include maximum total coverage and minimum total distances.
- The coverage of the facility is represented as a mathematical formulation.
- A novel heuristic algorithm is introduced to find best non-dominated solution sets.
