This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A unified formulation for the doubly-curved panels and shells of revolution.
- The proposed method is appropriate for general elastic restraints.
- New results for the laminated doubly-curved shells and panels are presented.
- Parameter study of the laminated doubly-curved shells and panels is presented.
