A new approach to the use of Lyapunov's functions. I. Stability and qualitative properties of paths in gas-solid systems

Stanisław Sieniutycz

PII: S0307-904X(16)30666-7
DOI: [10.1016/j.apm.2016.12.013](https://doi.org/10.1016/j.apm.2016.12.013)
Reference: APM 11475

To appear in: *Applied Mathematical Modelling*

Received date: 3 August 2015
Revised date: 26 October 2016
Accepted date: 15 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An insightful approach showing the role of thermodynamics in stability problems
- Thermodynamic potentials as Lapunov functions for equilibrium singular points
- Lapunov functions for disequilibrium singular points derived from rates of produced entropy
- A modification of the traditional approach to stability testing
