This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Universal control schemes are designed to achieve synchronization for coupled 2D and 3D quadratic chaotic systems in discrete-time.
- Universal Controller for 2D and 3D Quadratic Maps are presented.
- Numerical simulations are given to verify the effectiveness of the proposed synchronization schemes.
