This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- a multi-d discrete formulation of the Green-Naghdi equations on unstructured meshes
- the dispersive terms are regarded as an algebraic source term in the NSW equations
- an arbitrary high order of accuracy in space
- the scheme preserves the steady states at rest and the water height positivity
