Phase- and Sequence-Domain Static Models Equivalent to Long Double-Circuit Transmission Lines

Hamed Abdollahzadeh , Mostafa Jazaeri

PII: S0307-904X(17)30015-X
DOI: [10.1016/j.apm.2017.01.010](https://doi.org/10.1016/j.apm.2017.01.010)
Reference: APM 11507

To appear in: *Applied Mathematical Modelling*

Received date: 30 September 2014
Revised date: 27 August 2016
Accepted date: 5 January 2017

Please cite this article as: Hamed Abdollahzadeh , Mostafa Jazaeri , Phase- and Sequence-Domain Static Models Equivalent to Long Double-Circuit Transmission Lines, *Applied Mathematical Modelling* (2017), doi: [10.1016/j.apm.2017.01.010](https://doi.org/10.1016/j.apm.2017.01.010)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- **Static models equivalent to long mutually-coupled double-circuits lines are derived.**
- **Equivalent models of sequence networks of double-circuit lines are developed.**
- **Practical operating configurations of double-circuit lines are taken into account.**
- **Simulation results validate the accuracy of the equivalent models.**
