Analytical solution and nonconforming finite element approximation
for the 2D multi-term fractional subdiffusion equation

Y.M. Zhao, Y.D. Zhang, F. Liu, I. Turner, D.Y. Shi

PII: S0307-904X(16)30298-0
DOI: [10.1016/j.apm.2016.05.039](https://doi.org/10.1016/j.apm.2016.05.039)
Reference: APM 11192

To appear in: *Applied Mathematical Modelling*

Received date: 12 January 2016
Revised date: 13 May 2016
Accepted date: 18 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- 2D multi-term time fractional subdiffusion equation have been considered.
- Analytical solution is derived.
- The nonconforming FEM and L1 approximation are used.
- Stability and convergence are discussed.
