A Novel Stiffness/Flexibility-based Method for Euler-Bernoulli /
Timoshenko Beams with Multiple Discontinuities and Singularities

Reza Khajavi

PII: S0307-904X(16)30154-8
DOI: [10.1016/j.apm.2016.03.029](https://doi.org/10.1016/j.apm.2016.03.029)
Reference: APM 11097

To appear in: *Applied Mathematical Modelling*

Received date: 17 July 2015
Revised date: 28 February 2016
Accepted date: 23 March 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Beam elements with arbitrary multiple discontinuities and singularity are developed.
- Exact shape functions for such beams are calculated.
- An interesting physical interpretation for beam elements is proposed.
