The general a posteriori truncation method and its application to radiogenic source identification for the Helium production-diffusion equation

Yuan-Xiang Zhang, Liang Yan

PII: S0307-904X(16)30581-9
DOI: [10.1016/j.apm.2016.10.065](https://doi.org/10.1016/j.apm.2016.10.065)
Reference: APM 11427

To appear in: *Applied Mathematical Modelling*

Received date: 22 March 2016
Revised date: 10 October 2016
Accepted date: 27 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Formulate the truncation method in a uniform framework
- The obtained results could be adapted to a variety of inverse problems
- A posteriori error estimate for the radiogenic source identification
- algorithmic implementation for the proposed method
