Mathematical modeling of a whipping instability of an electrically charged liquid jet

Milan Šimko, David Lukáš

PII: S0307-904X(16)30329-8
DOI: [10.1016/j.apm.2016.06.018](https://doi.org/10.1016/j.apm.2016.06.018)
Reference: APM 11223

To appear in: *Applied Mathematical Modelling*

Received date: 28 October 2015
Revised date: 2 May 2016
Accepted date: 16 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A mathematical model of electrospinning nanofibers.
- Computer simulations of a path of the liquid jet.
- Computer simulations of a deposition of electrospun nanofibers.
