

# Accepted Manuscript

A transient model for temperature prediction in a salt-gradient solar pond and the ground beneath it

José Amigo, Francisco Meza, Francisco Suárez

PII: S0360-5442(17)30819-8

DOI: [10.1016/j.energy.2017.05.063](https://doi.org/10.1016/j.energy.2017.05.063)

Reference: EGY 10871

To appear in: *Energy*

Received Date: 6 March 2017

Revised Date: 22 April 2017

Accepted Date: 10 May 2017

Please cite this article as: Amigo José, Meza F, Suárez F, A transient model for temperature prediction in a salt-gradient solar pond and the ground beneath it, *Energy* (2017), doi: 10.1016/j.energy.2017.05.063.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **A transient model for temperature prediction in a salt-gradient solar pond and the**  
2 **ground beneath it**
