Development of Energy-Efficient Processes for Natural Gas Liquids Recovery

Sekwang Yoon, Michael Binns, Sang Min Park, Jin-Kuk Kim

PII: S0360-5442(17)30601-1  
DOI: 10.1016/j.energy.2017.04.049  
Reference: EGY 10689  
To appear in: *Energy*  
Received Date: 18 August 2016  
Revised Date: 24 February 2017  
Accepted Date: 08 April 2017

Please cite this article as: Sekwang Yoon, Michael Binns, Sang Min Park, Jin-Kuk Kim, Development of Energy-Efficient Processes for Natural Gas Liquids Recovery, *Energy* (2017), doi: 10.1016/j.energy.2017.04.049

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Development of a new energy-efficient natural gas liquids recovery process
- Improving energy recovery with application of process integration techniques
- Considering multiple different structural changes lead to considerable energy savings
