This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Title: Effect of Channel Aspect Ratio on Chemical Recuperation Process in Advanced Aeroengines

The Authors: Silong Zhang^a, Naigang Cui^a, Yuefei Xiong^b, Yu Feng^c, Jiang Qin^{b*}, Wen Bao^b

Affiliation : ^aSchool of Astronautics, Harbin Institute of Technology, China

^bSchool of Energy Science and Engineering, Harbin Institute of Technology, China

^cShenzhen Graduate School, Harbin Institute of Technology, China

Corresponding Author: Jiang Qin

Address: No.92, West Da-Zhi Street, Harbin, Heilongjiang, 150001, P.R.China.
