Forecasting method for global radiation time series without training phase:
comparison with other well-known prediction methodologies

Cyril Voyant, Fabrice Motte, Alexis Fouilloy, Gilles Notton, Christophe Paoli, Marie-Laure Nivet

PII: S0360-5442(16)31932-6
DOI: 10.1016/j.energy.2016.12.118
Reference: EGY 10120
To appear in: *Energy*
Received Date: 12 November 2016
Revised Date: 28 December 2016
Accepted Date: 29 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Solar radiation forecasting with time series formalism
- trainless approach compared to machine learning methods
- very simple method dedicated to solar irradiation forecasting with high accuracy
