This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Economic analyses based on 108 electricity loads in existing multifamily buildings
- Shows the effects of financial support measures for different electricity loads
- Results can be used as support when evaluating national incentive programmes
