Optimal multicomponent working fluid of organic Rankine cycle for exergy transfer from liquefied natural gas regasification

Ung Lee, Alexander Mitsos

PII: S0360-5442(17)30518-2

DOI: [10.1016/j.energy.2017.03.126](https://doi.org/10.1016/j.energy.2017.03.126)

Reference: EGY 10593

To appear in: *Energy*

Received Date: 10 December 2016

Revised Date: 21 March 2017

Accepted Date: 25 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Optimal Multicomponent Working Fluid of Organic Rankine Cycle for Exergy Transfer from Liquefied Natural Gas Regasification

Ung Lee^a and Alexander Mitsos^{a*}
