This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title Stabilization Effect of the Fission Source in
Coupled Monte Carlo Simulations

Category of paper Technical note

Review field Reactor Physics
Reactor Analysis Method

Preprint submitted to Nuclear Engineering and Technology

Date (submission) October 4, 2016

Date (revision) February 14, 2017

First author Børge Olsen (Corresponding author)

Degree M.Sc.

E-mail borge@engineer.com

Affiliation KTH Royal Institute of Technology
Division of Nuclear Reactor Technology

Address AlbaNova University Center
