How to Achieve Low/no-Fossil Carbon Transformations: With a Special Focus upon Mechanisms, Technologies and Policies

Lin Zhao, Guozhu Mao, Yutao Wang, Huibin Du, Hongyang Zou, Jian Zuo, Yong Liu, Donald Huisingh

PII: S0959-6526(16)32217-X
DOI: 10.1016/j.jclepro.2016.12.154
Reference: JCLP 8729
To appear in: *Journal of Cleaner Production*
Received Date: 27 December 2016
Accepted Date: 28 December 2016

Please cite this article as: Lin Zhao, Guozhu Mao, Yutao Wang, Huibin Du, Hongyang Zou, Jian Zuo, Yong Liu, Donald Huisingh, How to Achieve Low/no-Fossil Carbon Transformations: With a Special Focus upon Mechanisms, Technologies and Policies, *Journal of Cleaner Production* (2016), doi: 10.1016/j.jclepro.2016.12.154

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- (1) The content of the articles published in this Special Volume were summarized.
- (2) Problem categories about mechanism research of low/no-fossil carbon transformations were analyzed.
- (3) Pathway characteristics of low/no-fossil carbon transformations at different scales were assessed.
- (4) Research achievements with special, low/no-fossil carbon technologies were investigated.
- (5) Promising progress in designing and implementation of low/no-fossil carbon policies were highlighted.
