This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A measurement index system is introduced to reflect the regional eco-innovation level.
- The regional eco-innovation index for China has been calculated for 2000 to 2014.
- There is an obvious graded distribution in regional eco-innovation levels in China.
- Regional differences among the factors influencing eco-innovation are investigated.
- Several beneficial policy implications are proposed for regional eco-innovation.
