This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Energy indices of MSW recycle was studied.
- Environmental impacts of MSW recycle assessed by LCA methodology.
- CExD of MSW recycle evaluated to quantify the primary energy use.
- A model to predict the rate of MSW recycle was presented with ANN.
- Sensitivity analysis was done for proposed model by ANN.
