Evidence of the water-energy nexus in tourist accommodation

Susanne Becken, Char-lee McLennan

PII: S0959-6526(16)32230-2
DOI: 10.1016/j.jclepro.2016.12.167
Reference: JCLP 8742
To appear in: *Journal of Cleaner Production*
Received Date: 25 May 2016
Revised Date: 06 December 2016
Accepted Date: 31 December 2016

Please cite this article as: Susanne Becken, Char-lee McLennan, Evidence of the water-energy nexus in tourist accommodation, *Journal of Cleaner Production* (2016), doi: 10.1016/j.jclepro.2016.12.167

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Robust energy, water and waste benchmarks for tourist accommodation are provided.
- Certified hotels reduce resource intensity by several percent per annum.
- Energy, water and waste inputs and outputs are closely related.
- Synergies from the water-energy nexus are evident.
