This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## HIGHLIGHTS

- *Crop protection solutions include different service levels.*
- *Complying with environmental regulation is rather simple for small grape growers.*
- *New skills and IPM technologies are necessary to provide crop protection solutions.*
- *Collective action favors further adoption of servicizing in smallholding viticulture.*
- *There is a pesticides lock-in situation in viticulture at Rías Baixas DO.*
