This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights:**

- The study analyzed construction and demolition waste management in Shenzhen;
- Five drawbacks were identified in current C&D waste management practices;
- Five measures with several supporting methods were proposed to improve the situation.
