This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Research highlights

- The study explores policy directions for driving construction waste mitigation in the UK
- Data was collected from experts through focus group discussions and questionnaires
- The result suggests the needs for incentives and enablers for good waste performers
- Design stages and sustainable design appraisal system must be targeted by new policies
- The results suggests the need for more stringency of existing fiscal and legislative provisions
