This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Bioclimatic concept for saving energy and improvement of indoor living conditions.
- Experiences on practical ways to embed sustainable principles in a building design.
- Analysis of risk factors in bioclimatic renovation and rehabilitation of buildings.
- Experimental studies for thermal comfort assessment based on meteorological data.
- Case study: evaluation of bioclimatic construction practices with tropical housing.
