Methane hydrate-liquid-vapour-equilibrium phase condition measurements in the presence of natural amino acids

Cornelius B. Bavoh, Behzad Partoon, Bhajan Lal, Lau K. Keong

PII: S1875-5100(16)30897-6

DOI: [10.1016/j.jngse.2016.11.061](https://doi.org/10.1016/j.jngse.2016.11.061)

Reference: JNGSE 1971

To appear in: *Journal of Natural Gas Science and Engineering*

Received Date: 6 September 2016

Revised Date: 9 November 2016

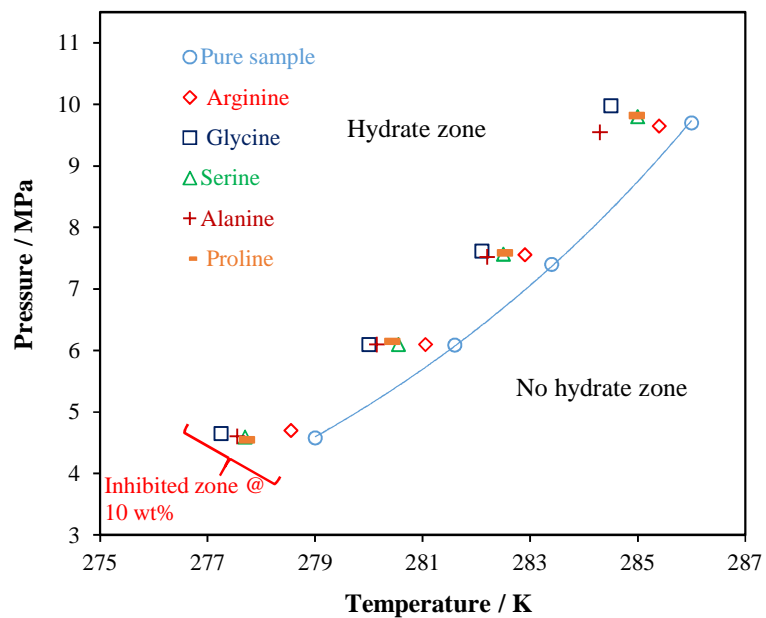

Accepted Date: 29 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

GRAPHICAL ABSTRACT

The impact of amino acids on methane hydrate phase boundary conditions have been studied.
