Candidate Volcanic and Impact-Induced Ice Depressions on Mars

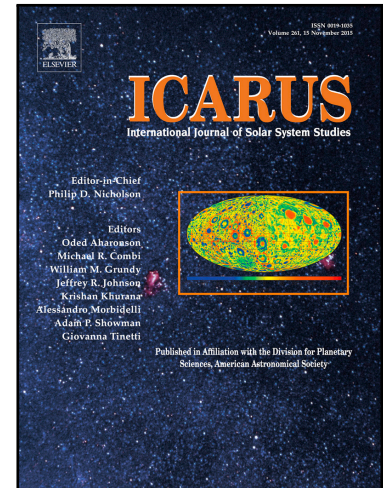

Joseph S. Levy , Timothy A. Goudge , James W. Head ,
Caleb I. Fassett

PII: S0019-1035(16)30209-3
DOI: [10.1016/j.icarus.2016.10.021](https://doi.org/10.1016/j.icarus.2016.10.021)
Reference: YICAR 12237

To appear in: *Icarus*

Received date: 20 May 2016
Revised date: 17 October 2016
Accepted date: 20 October 2016

Please cite this article as: Joseph S. Levy , Timothy A. Goudge , James W. Head , Caleb I. Fassett , Candidate Volcanic and Impact-Induced Ice Depressions on Mars, *Icarus* (2016), doi: [10.1016/j.icarus.2016.10.021](https://doi.org/10.1016/j.icarus.2016.10.021)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Concentric fracture features on Mars are mapped in 3D
- Fracture patterns are consistent with subsidence following ice loss
- Volcanic and/or impact mechanisms could account for ice loss
