This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Radar confirms asteroid 16 Psyche to be the largest metal asteroid in the main belt.
- A Psyche shape model was generated using radar, adaptive optics, and occultation data
- The shape model of Psyche shows evidence of large scale features.
- Psyche displays significant variations in radar and optical albedo with rotation.
