Light Curve Solutions of the Eccentric Binaries KIC10992733,
KIC5632781, KIC10026136 and their Out-of-Eclipse Variability

Diana Kjurkchieva, Doroteya Vasileva

PII: S1384-1076(17)30027-1
DOI: [10.1016/j.newast.2017.07.001](https://doi.org/10.1016/j.newast.2017.07.001)
Reference: NEASPA 1114

To appear in: *New Astronomy*

Received date: 14 January 2017
Revised date: 5 July 2017
Accepted date: 8 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Orbital and stellar parameters of eccentric eclipsing stars KIC 10992733, KIC 5632781, KIC 10026136 were determined
- The oscillations of KIC 10992733 were attributed to spot(s)
- KIC 5632781 and KIC 1002613 exhibit tidally-induced features around the periastron phases
