

## Accepted Manuscript

An Analysis for Spatio-spectral Acoustic Filtering Effect of Sonic Crystals

Serkan Alagoz

PII: S0577-9073(16)30284-2  
DOI: [10.1016/j.cjph.2016.08.003](https://doi.org/10.1016/j.cjph.2016.08.003)  
Reference: CJPH 88

To appear in: *Chinese Journal of Physics*

Received date: 10 June 2016  
Revised date: 21 July 2016  
Accepted date: 2 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- This study investigates frequency-selective spatial acoustic filtering effect
- Sonic crystal flat lens can be used for narrow-band harmonic enhancement
- Negative refraction acts on spatial filtering of acoustic waves
- Impulse response of sonic crystals reveal spatio-spectral features of crystals
