Hydromagnetic unsteady squeezing flow of Jeffrey fluid between two parallel plates

Taseer Muhammad, Tasawar Hayat, Ahmed Alsaedi, Abdul Qayyum

PII: S0577-9073(17)30139-9
DOI: [10.1016/j.cjph.2017.05.008](https://doi.org/10.1016/j.cjph.2017.05.008)
Reference: CJPH 239

To appear in: *Chinese Journal of Physics*

Received date: 14 February 2017
Revised date: 7 May 2017
Accepted date: 9 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Unsteady squeezing flow of non-Newtonian fluid is modelled.
- Magnetic field applied is in transverse direction.
- Constitutive relation for Jeffrey fluid is employed.
- Magnetic Reynolds number is assumed small.
- Both series and numerical solutions are constructed and compared.
