Mathematical Study of Peristaltic Propulsion of Solid-Liquid
Multiphase Flow with a Biorheological fluid as the Base Fluid in a Duct

A. Zeeshan , N. Ijaz , M.M. Bhatti , A.B. Mann

PII: S0577-9073(17)30241-1
DOI: [10.1016/j.cjph.2017.05.020](https://doi.org/10.1016/j.cjph.2017.05.020)
Reference: CJPH 263

To appear in: *Chinese Journal of Physics*

Received date: 10 March 2017
Revised date: 6 May 2017
Accepted date: 6 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Three-dimensional peristaltic flow through a rectangular duct has been studied.
- A biorheological Casson fluid model is considered.
- An external magnetic field is also taken into account using the Lorentz force law.
- The eigenfunction expansion method is used to obtain the exact solutions.
- An excellent graphical comparison is presented to validate the current results and the method.
