

Author's Accepted Manuscript

Study of nanocrystalline thin cobalt films with perpendicular magnetic anisotropy obtained by thermal evaporation

Witold Kozłowski, Józef Balcerski, Witold Szmaja

PII: S0304-8853(16)31737-1
DOI: <http://dx.doi.org/10.1016/j.jmmm.2016.09.111>
Reference: MAGMA61892

To appear in: *Journal of Magnetism and Magnetic Materials*

Received date: 8 August 2016
Revised date: 16 September 2016
Accepted date: 23 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Study of nanocrystalline thin cobalt films with perpendicular magnetic anisotropy obtained by thermal evaporation

Witold Kozłowski ^{*}, Józef Balcerski, Witold Szmaja
