Enhanced Lwax textures: A potential MRI surrogate marker of hepatic fibrosis in a murine model

Baojun Li PhD, Hernan Jara PhD, Heishun Yu MD, Michael O'Brien MD, Jorge Soto MD, Stephan W. Anderson MD

PII: S0730-725X(16)30218-1
DOI: doi: [10.1016/j.mri.2016.11.008](https://doi.org/10.1016/j.mri.2016.11.008)
Reference: MRI 8663

To appear in: *Magnetic Resonance Imaging*

Received date: 19 July 2016
Revised date: 31 October 2016
Accepted date: 12 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhanced laws textures: A potential MRI surrogate marker of hepatic fibrosis in a murine model

Acknowledgement

We would like to thank Dr. Karen Buch for her inspiring discussions during this study. We would also like to express our gratitude to the anonymous reviewers for their precious time and expert critics that have made the manuscript a much better one. The authors have no relevant conflicts of interest to disclose.

Running Title

Enhanced Laws textures as MRI marker of hepatic fibrosis
