Activation volume vs BOLD signal change as measures of fMRI activation – Its impact on GABA – fMRI activation correlation

Pallab K. Bhattacharyya, Micheal D. Phillips, Lael A. Stone, Mark J. Lowe

PII: S0730-725X(17)30113-3
DOI: doi: [10.1016/j.mri.2017.06.009](https://doi.org/10.1016/j.mri.2017.06.009)
Reference: MRI 8781

To appear in:

Received date: 9 January 2017
Revised date: 15 May 2017
Accepted date: 16 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Activation volume vs BOLD signal change as measures of fMRI activation – its impact on GABA – fMRI activation correlation R1.1
