Non-Hermitian time-dependent perturbation theory: Asymmetric transitions and transitionless interactions

Stefano Longhi, Giuseppe Della Valle

PII: S0003-4916(17)30257-9
DOI: <http://dx.doi.org/10.1016/j.aop.2017.08.026>
Reference: YAPHY 67478

To appear in: *Annals of Physics*

Received date: 19 January 2017
Accepted date: 25 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights of " Non-Hermitian time-dependent perturbation theory: asymmetric transitions and transitionless interactions" by S. Longhi and G. Della Valle

- New results in non-Hermitian time-dependent perturbation theory
- Prediction of unidirectional transitions and transitionless interactions
- Explanation of chirality in dynamical encircling of exceptional points
