The investigation of the lateral interaction effect's on traffic flow behavior under open boundaries

M. Bouadi, K. Jetto, A. Benyoussef, A. El Kenz

PII: S0375-9601(17)30894-0
DOI: <http://dx.doi.org/10.1016/j.physleta.2017.09.029>
Reference: PLA 24742

To appear in: *Physics Letters A*

Received date: 24 July 2017
Revised date: 15 September 2017
Accepted date: 16 September 2017

Please cite this article in press as: M. Bouadi et al., The investigation of the lateral interaction effect's on traffic flow behavior under open boundaries, *Phys. Lett. A* (2017), <http://dx.doi.org/10.1016/j.physleta.2017.09.029>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Lateral interaction with spatial defects and open boundary conditions.
- The effect of the different spatial defects distributions.
- The inflow and maximum flow functions.
- The threshold at which the phase segregation appears.
