Polarization Conversion under Focusing of Vortex Laser Beams along the Axis of Anisotropic Crystals

Svetlana N. Khonina, Sergei V. Karpeev, Vyacheslav D. Paranin, Andrei A. Morozov

PII: S0375-9601(17)30479-6
DOI: <http://dx.doi.org/10.1016/j.physleta.2017.05.025>
Reference: PLA 24507

To appear in: *Physics Letters A*

Received date: 15 February 2017
Revised date: 12 May 2017
Accepted date: 14 May 2017

Please cite this article in press as: S.N. Khonina et al., Polarization Conversion under Focusing of Vortex Laser Beams along the Axis of Anisotropic Crystals, *Phys. Lett. A* (2017), <http://dx.doi.org/10.1016/j.physleta.2017.05.025>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We develop optical system to produce cylindrically polarized higher orders beams.
- Generation of vector beams in an anisotropic crystal is analyzed theoretically.
- Experiments are realized in a calcite crystal.
