

## Accepted Manuscript

A new class of solutions for the multi-component extended Harry Dym equation

Michal Marvan, Maxim V. Pavlov

PII: S0165-2125(17)30094-X

DOI: <http://dx.doi.org/10.1016/j.wavemoti.2017.07.007>

Reference: WAMOT 2181

To appear in: *Wave Motion*

Received date: 3 May 2017

Accepted date: 13 July 2017

Please cite this article as: M. Marvan, M.V. Pavlov, A new class of solutions for the multi-component extended Harry Dym equation, *Wave Motion* (2017), <http://dx.doi.org/10.1016/j.wavemoti.2017.07.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- we obtain a new class of solutions of multi-component extended Harry Dym systems
- the method extends to other systems transformable to their high-frequency limits
- finite-gap solutions are transformed to solutions still of wave-like nature
