Polymorphisms and mutations in the melanocortin-3 receptor and their relation to human obesity

Andrew P. Demidowich, Joo Yun Jun, Jack A. Yanovski

PII: S0925-4439(17)30105-9
DOI: doi:[10.1016/j.bbadis.2017.03.018](https://doi.org/10.1016/j.bbadis.2017.03.018)
Reference: BBADIS 64724

To appear in: *BBA - Molecular Basis of Disease*

Received date: 2 January 2017
Revised date: 23 March 2017
Accepted date: 27 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Polymorphisms and mutations in the melanocortin-3 receptor and their relation to human obesity

Running Title: MC3R polymorphisms in humans

Andrew P. Demidowich, MD^{1*}, Joo Yun Jun, PhD^{1*}, Jack A. Yanovski, MD, PhD¹

¹Section on Growth and Obesity, Program in Developmental Endocrinology and Genetics, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health, Bethesda, MD

*APD and JYJ contributed equally to the manuscript and are designated as co-first authors.

Sources of funding: This research was supported by the Division of Intramural Research of the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD), NIH ZIAHD00641 (to JAY), with supplemental funding from NIMHD and the NIH Clinical Center Bench to Bedside Program. Dr. Yanovski reports receiving unrelated grant funding from Zafgen Inc. for a clinical trial of pharmacotherapy to treat obesity and hyperphagia in patients with the Prader-Willi syndrome and from Rhythm Pharmaceuticals Inc. for support of sequencing of genes related to obesity and for a trial of setmelanotide to treat patients with monogenic obesity syndromes in the leptin signaling pathway. No sponsors were involved in the collection,
